Appendix A – Contacting the Accessibility Advisory Committee

Introduction

The Accessibility for Ontarians with Disabilities Act, 2005 (AODA), received Royal Assent in June 2005, which requires that Ontario be an accessible province by 2025. The purpose of the legislation is to develop, implement and enforce standards in order to achieve accessibility for all Ontarians. The standards are to establish measures, policies, practices or other requirements for the identification and removal of barriers to accessibility.

The AODA is a more expansive legislation than the original Ontarians with Disabilities Act, 2001 (ODA), as it covers organizations in the private and the public sectors. Ontario's first accessibility standard came into effect on January 1, 2008. The Accessibility Standards for Customer Service (Ontario Regulation 429/07) outlines what must be done to ensure the provision of accessible customer service to persons with various disabilities through three standards – information and communications, employment and transportation.

The new Integrated Accessibility Standards (Ontario Regulation 191/11) under the AODA came into force on July 1, 2011. This regulation combines the three accessibility standards under the Accessibility Standards for Customer Service into a design to remove barriers in five (5) identified areas:

1. **Transportation** – making it easier for persons with disabilities to get where they need to go.
2. **Information and Communication** – giving persons with disabilities access to more of the information that we all depend on.
3. **Employment** – expanding Ontario's labour pool and welcoming more persons with disabilities into more workplaces.
4. **Customer Service** – providing good customer service, understanding that people with disabilities may have different needs.
5. **Built Environment (design of public spaces)** – removing barriers in public spaces and buildings making it easier for all Ontarians, including people with disabilities, to access places where they work, travel, shop and play.

These standards are being phased in over a period of time. The Built Environment standard, which applies to facilities and outdoor spaces, is in draft form and undergoing a public consultation process.

Implementation

Description:

St. Joseph's Health Centre (SJHC) is an organization that is sponsored by the Catholic Health Sponsors of Ontario (CHSO). The purpose of CHSO is to preserve and enhance Catholic health care ministry. SJHC is comprised of:

- St. Joseph's Continuing Care Centre (SJCCC), a 64 bed continuum of care facility, which was required to comply with the Customer Service Standard by January 1, 2010. SJCCC formed its Accessibility Advisory Committee and committed to the philosophy of the AODA and ODA and to fulfilling the obligations under the Acts.
- St. Joseph's Villa (SJV) and Villa St. Gabriel Villa (VSGV), both 128 bed long term care facilities, became subject to the Act and its Regulations on January 1, 2012.
- St Joseph's Health Centre (SJHC), as the parent company for all three sites, became subject to the Act and Regulations on January 1, 2012. SJHC has since revamped the Accessibility Advisory

Committee to include members collectively from all three sites and hence, has developed a well-defined collaborative working group to tackle in ongoing requirements.

Mission

As a Catholic organization, we faithfully continue the healing Mission of Jesus, and respond to the needs of the whole person - body, mind and spirit.

Vision

To lead the community in creating centers of excellence in wellness and aging.

Values

Guided by our core values of *Dignity*, *Excellence*, *Service* and *Integrity* we will promote spiritual, physical, emotional and social well-being.

Intent:

SJHC has committed itself to the continual improvement of access to hospital facilities and long term care homes. Review and revisions to current policies, programs, practices and services for patients/residents, their family members, staff, health care practitioners, volunteers and members of the community with disabilities are completed on an annual basis unless required sooner. The participation of persons with disabilities in the development and review of its accessibility plans and the provision of quality services to all patients/residents, family members and members of the community with disabilities are at all times welcomed and encouraged. This commitment is aligned with our core values of service and excellence which looks to provide exceptional service with a focus on quality of care and patient/resident safety.

This multi-year Accessibility Plan builds on the previous work of the Accessibility Advisory Committee. It outlines the measures that will be taken to identify, remove and prevent barriers to persons with disabilities who live, work in or use the facilities and services of SJCCC, SJV and VSV including patients/residents and their family members, staff, health care practitioners, volunteers and other members of the community.

Aim

This Multi-year Accessibility Plan is a road map that describes how SJHC and its three sites will strive to meet the regulations and guidelines to ensure all our organizations are accessible. Over the last several years, the SJHC Board of Directors aim has focused on creating an organization that has an informed and committed leadership; an organization-wide alignment and coordination of efforts to streamline and amalgamate services amongst the organizations; strong governance and accountability; and a method of measurement, evaluation and reporting that is meaningful and maps an action plan for improvement.

The Accessibility Advisory Committee (AAC)

In keeping with the core value of excellence, SJHC is committed to ensuring the development of an accessible environment that is an evolution of a culture that supports barrier-free access to care and services.

Originally the committee was formed in 2010 with the focus on the requirements for SJCCC, as a hospital, to comply with the AODA, 2005. The committee has been revised with an expanded membership to include representatives from all sites as well as input from organizations/ agencies and service providers collectively providing a cross disability perspective.

While some members of the working group are administrative staff, other members work directly with patients/residents and staff members who have a range of disabilities. In the upcoming year, the committee will extend invitations to several members of the community to participate at varying stages, as resources and experts within their identified fields.

Commitment to Accessibility Planning

St. Joseph's Health Centre is committed to treating all people in a way that allows them to maintain their dignity and independence. We believe in integration, cultural diversity and equal opportunity. We are committed to meeting the needs of people with disabilities in a timely manner, and will do so by preventing and removing barriers to accessibility and meeting accessibility requirements under the *Accessibility for Ontarians with Disabilities Act*.

Barrier Identification Methodologies

The AAC will use the following barrier-identification methodologies for this multi-year report:

Methodology	Description	Status
Concerns expressed to Patient and/or Resident and Family Councils	Patient and/or Resident and Family Councils are encouraged to identify areas of concern, if any, and to offer suggestions for increased accessibility.	All complaints were forwarded to the AAC for review and appropriate action.
Issues identified through Occupational Health & Safety Committees	Issues relating to accessibility are identified through regular monthly health & safety inspections as well as incident reports.	All issues were forwarded to the AAC for review and appropriate action.
Review of issues through Human Resources	Sources of information include: SJHC review specifically related to harassment & bullying reported and other human rights complaints.	Recommendations and information from these initiatives are forwarded to the Committee for review and inclusion as appropriate.
Accessibility Committee	Participation of representatives from a variety of areas. Review of barrier elimination initiatives. Request for more information where appropriate.	Ongoing
Canvassing employees	Staff is reminded to report any deficiencies in accessibility, not only when they attend accessibility awareness training sessions or complete the self-education package but on a regular basis when the barrier is first identified.	<p>Training sessions, newsletters and posters raise organizational awareness. Issues are brought to the AAC attention for follow up.</p> <p>Staff is encouraged to report any deficiencies to their immediate supervisor who will channel it to the correct department.</p> <p>Staff can also input suggestions that address or increase accessibility for staff, residents/patients, family members and other visitors or service providers through our electronic ideas software (AIM).</p>
Information desks (reception, nursing stations, administration)	Feedback received from both staff and volunteers who work at various information desks.	Concerns brought to the Committee for consideration.
Canvassing Committees of the facilities	The Accessibility Advisory Committee will survey members of Committees to identify areas of concern.	Issues are brought to Accessibility Advisory Committee and formalized for information and

	(e.g. debriefs from Occupational Health and Safety inspections, Adverse Event and Near Miss reports, Staff Incident & Hazard reports, monthly departmental meetings concerns) Stakeholders within Committees may also advise the Accessibility Advisory Committee concerning matters in the	follow-up. An Action Plan is developed and forwarded to Senior Management for approval when necessary.
Methodology	Description	Status
	Community that may affect how persons with disabilities experience health care at our facilities. They provide important insight in accessibility issues.	
Community /staff consultation	Creation of email address: accessibility@ajsudbury.com and staff resource person to contact: Program Assistant for Corporate Services @ 705-674-2846 ext. 2222	Concerns received through these two sources.
Legislation changes	Legislation is monitored to ensure Hospital and Long-term Care home compliance is maintained.	Changes are regularly occurring to processes as legislation changes.
Review of construction/renovation projects	Construction projects reviewed by members of Building & Property Committee with knowledge of accessibility. Smaller renovation projects are reviewed by Quality Councils	Concerns identified through new construction projects or plans for renovations.
Employee Modified Work Program	Issues related to staff and accessibility identified by employee or manager/supervisor.	Concerns identified through interventions with employees.

Barriers were identified using the above process. These were gathered and considered by the Committee. Decisions regarding barrier removal initiatives were made using a list of criteria. The criteria (in no specific order) are:

- Legislative requirements;
- Patient/Resident/staff/visitor safety and risk identification;
- Number of complaints about an issue;
- Cost;
- Patient/Resident/Visitor/Staff satisfaction (verbally or through surveys); and
- Best Practice/Innovation.

Barriers and means to prevent barriers were identified as being in one of nine categories:

1. Attitudinal;
2. Physical and Cognitive;
3. Architectural;
4. Informational;
5. Communication;
6. Technological;
7. Policies and procedures;
8. Employment; and
9. Employment accommodation inquiries.

The Committee identified the barriers which will be removed or addressed over a three year period. The Integrated Accessibility Standards Regulation is now in effect and the work plan includes plans to begin the process of compliance with the mandatory requirements as detailed in the regulation.

Reg. 413/12 s. 6) Obligated organizations shall ensure that parking spaces for the use of persons with disabilities are required under section 80.36 are distinctly indicated by erecting an accessible permit parking sign in accordance with section 11 of Regulation 581.</p>	Jan 1.16	Jan 1. 17	Jan 1.17			
<p>Maintenance of accessible elements (AODA, 2005, O. Reg. 191/11, s. 80.44, O. Reg. 413/12 s. 6) In addition, obligated organizations shall ensure that their multi-year accessibility plans include the following: 1. Procedures for preventative and emergency maintenance of the accessible elements in public spaces as required under this Part 2. Procedures for dealing with temporary disruptions when accessible elements required under this Part are not in working order.</p>	Jan 1.16	Jan 1.17	Jan 1.17			

REVIEW AND MONITORING PROCESS

Accessibility planning is an important means of improving both the safety and quality of service delivery to the populations we serve, of attracting and retaining employees, and of increasing the efficiency of our operations. It also leads to improved patient/resident experience which benefits everyone.

The AAC, through the office of the Vice-President, Corporate Services at SJHC, will assume responsibility for the monitoring and evaluation of the current plan and for the development of subsequent annual plans.

Specifically, the AAC will:

- Evaluate the previous year's results against the identified targets
- Ensure the inventory of new barriers is updated and prioritized
- Ensure implementation strategies are identified and carried out
- Ensure the plans are endorsed by Senior Management and that funds are allocated appropriately

The AAC will liaise directly with programs and departments to achieve these objectives. Through the annual budget process, departments will identify and submit applicable budgeting requirements as required for program, service or project strategies identified for barrier identification, prevention or removal. Progress reports will be received from departments charged with specific implementation activities and reviewed by the Committee.

The AAC will provide updates to Senior Management on an annual basis. Progress reports on the Plan will be prepared and circulated through the individual facility websites when deemed prudent, facility information servers and e-mail to those members directly affected or involved.

COMMUNICATION OF THE PLAN

The Accessibility Plan will be posted on SJHC website. Paper copies will be available at all sites and through the Administration offices. On request, the plan can be made available in alternative formats such as electronic and large print.

Information and location of the plan will be provided to all new employees during their orientation sessions. Staff meetings are used to communicate to current employees the existence and location of the plan. Information regarding the plan is communicated through the website, as well as the Administrator Information Sessions.

Appendix #1

The Accessibility Advisory Committee

The committee is comprised of members from all sites:

- St. Joseph's Health Centre
- St. Joseph's Continuing Care Centre
- St. Joseph's Villa
- Villa St. Gabriel Villa

In the event you wish to provide feedback or have any concerns please forward your concerns to the following e-mail address: accessibility@sjsudbury.com

Or

Mail to: St. Joseph's Health Centre
1140 South Bay Road,
Sudbury, ON P3E 0B6
