

## MRSA

### Calculating Rates

The MRSA infection rate is calculated as a rate per 1,000 patient days. The “total patient days” represents the sum of the number of days during which services were provided to all inpatients during the given time period.

### The rate is calculated as follows:

$$\frac{\text{Number of new hospital-acquired cases of MRSA in our facility}}{\text{Total number of patient days (for one month)}} \times 1000$$

Indicator: Methicillin-resistant Staphylococcus aureus (MRSA)					
Year	Description	April to June	July to September	October to December	January to March
2021-2022	Number of new cases	0	0	0	
	MRSA rate	0.00	0.00	0.00	
2020-2021	Number of new cases	0	0	0	0
	MRSA rate	0.00	0.00	0.00	0.00
2019-2020	Number of new cases	0	0	0	0
	MRSA rate	0.00	0.00	0.00	0.00
2018-2019	Number of new cases	0	0	0	0
	MRSA rate	0.00	0.00	0.00	0.00
2017-2018	Number of new cases	0	0	0	0
	MRSA rate	0.00	0.00	0.00	0.00
